

## **Revised Battallion Masse Rule for Aspern-Essling**

Try this rule combined with the Cavalry Clash table. Together they cut the French Cavalry down to size considerably, something that a lot of players has asked for.

- Austrian columns has 7 MP's.
- Austrian columns uses the same Fire Point Table as the "normal" Non-French Columns.
- During steps E and F of the Cavalry Charge Subsequence Austrian columns are considered to have all around facing for both fire and morale purposes and will retreat one hex less than called for by the Morale Table.
